

WASTE MANAGEMENT AND ENVIRONMENT IMPROVEMENT MEASURES TO ENSURE A SUSTAINABLE GREEN CAMPUS

The Waste Management Policy of the Rajiv Gandhi Institute of Management and Science (RGIMS) delineates the establishment's dedication to mitigating its adverse environmental effects through the use of environmentally sustainable approaches to waste conversion and effective waste management. The objective of the campus is to achieve environmental friendliness and achieve a zero-waste status by implementing the "Reduce, Reuse, and Recycle" policy.

OBJECTIVES

- Promote advertising partnerships with corporations, non-profit organisations, and government bodies. Waste reduction, reuse, and recycling are all excellent practises.
- reducing the quantity of waste that is produced.
- decreasing the level of consumption of natural resources. Pollution can be mitigated by means of effective waste management and proper disposal policies.
- In order to promote and guarantee the efficient provision of waste management services. Integration of planning and reporting pertaining to waste management is crucial.
- It is crucial that through the deployment of awareness programmes, all relevant parties be made cognizant of the detrimental effects that waste has on the environment, environment protection, and human health.
- Ensure that consumers are cognizant of the necessity to decrease waste. Ensure environmental protection through the implementation of effective waste management strategies.
- Encourage alternative techniques of waste-to-energy conversion through programmes and research. To ensure the institute's status as a trailblazer in the adoption of ecologically sustainable waste management practises, it is critical that every member of the faculty, support staff, student body, and housekeeping staff participates in training.
- In order to foster environmentally conscious practises on campus, it is critical to promote collaborations with nonprofit organisations, government agencies, and enterprises. Ensure the implementation of sustainable practises throughout the university.

INITIATIVES OF RGIMS

- The establishment is the proprietor of a plastic shredding factory.
- Bitumen is produced by shredding plastic waste; this bitumen is subsequently utilised to tar roadways.
- Following the completion of destructive tests, concrete cubes are employed in the classrooms to construct a variety of platforms and pavements.
